Constantine is a collection of 8 new mouldings with a fresh adaptation of traditional ogee profiles simplified for complementing classical to contemporary art and design themes.

The four finishes of gold, silver, black and cream are embellished with delicate leaf breaks, brush lines, distressed edges, and subtle washes that enhance the brilliance of the gilding while creating the warmth of an aged patina that gives the collection its signature transitional appeal.

Constantine is ideal for classical works such as oil and watercolor paintings, etchings, pastels, and portraiture, as well as an attractive solution for framing today's popular decorative art and prints.
