OSLO™

Oslo is a collection of 10 classic maple veneer mouldings with 2 profiles stained in 5 wood tones. The simplicity of the profiles and finishes make Oslo an indispensable collection well suited for many types of artwork. Oslo mouldings are essential basics, a valuable "go-to" resource for numerous projects as well as providing framing solutions for a variety of tastes in design.

Oslo's maple veneer is laid over pine, giving you the fine grain of hardwood maple without the difficulty in cutting and joining a hardwood moulding.

The clean, geometric profiles and warm wood tones of Oslo work nicely with photography and artwork in either a colorful or neutral palette.
