XAVIER

Made in Italy, Xavier is a collection of 8 mouldings featuring 4 metallic finishes of gold, silver, pewter and dark pewter upon a classic silhouette. The pitted and rubbed surface of the metal finish lends textural and tonal complexity to modern, industrial and urban art, photography, vintage lithography, and more.

Xavier's neutral finishes of silver and pewter add depth to black & white and silver print photography. These finishes offer great alternative framing solutions to standard black or white mouldings, while gold items (84060 & 84064) are well suited for the warmer tones of sepia photos and full color pieces.

☆ Fine Gesso= Great Cuts

Xavier finishes are layered on extremely fine gesso, offering great yield at the saw and easy joining.
